# Customized products are the IEA standard.

IEA is unique in its ability to create individualized solutions ...

*... at prices usually reserved for “off the shelf” products.*

**THE RIGHT ANSWER DOESN'T HAVE TO BE EXPENSIVE.**

IEA designs to first meet the customer's cooling requirements, and then to deliver that protection in the most cost efficient way possible.

**THE RIGHT ANSWER DOESN'T HAVE TO BE SLOW IN COMING.**

IEA operates its manufacturing to deliver customized products in some of the industry's shortest turn around times.

**THE RIGHT ANSWER COMES WITH THE RIGHT ATTITUDE.**

IEA maintains the value of its products by never letting the customer go it alone: original parts, accurate, complete and readily available service information, on-site personnel.

Regardless of the application, location or budget allocation, IEA can produce an answer that will meet or exceed specification.
